

Recombinant Human PURA

Cat. No. PURA-31263TH **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant fragment of Human PURA with N terminal proprietary tag, 31.24kDa inclusive of tag.
Species	Human
Source	Wheat Germ
ProteinLength	51 amino acids
Description	This gene product is a sequence-specific, single-stranded DNA-binding protein. It binds preferentially to the single strand of the purine-rich element termed PUR, which is present at origins of replication and in gene flanking regions in a variety of eukaryotes from yeasts through humans. Thus, it is implicated in the control of both DNA replication and transcription. Deletion of this gene has been associated with myelodysplastic syndrome and acute myelogenous leukemia.
