

Recombinant Mouse Interleukin 3

Cat. No. IL3-542M **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant humanIL3 was expressed in E. coli and purified recombinant Mouse IL3 protein.
Species	Mouse
Source	Mouse
Description	IL3 is a hematopoietic growth factor that promotes the survival, differentiation and proliferation of committed progenitor cells of the megakaryocyte, granulocyte-macrophage, erythroid, eosinophil, basophil and mast cell lineages. Produced by T cells, mast cells and eosinophils, IL3 enhances thrombopoiesis, phagocytosis, and antibody-mediated cellular cytotoxicity. Its ability to activate monocytes suggests that IL3 may have additional immunoregulatory roles. Many of the IL3 activities depend upon co-stimulation with other cytokines. IL3 is species-specific, variably glycosylated cytokine.
Form	Supplied lyophilized with no additives. Reconstitute in water to a concentration of 0.1-1.0 mg/ml. Keep pH below 5.0.
Purity	>98% pure by SDS-PAGE and HPLC
