

FGL1- New Immune Inhibitory Ligand of LAG-3

Learn More

The latest research has identified FGL1 as an immune inhibitory ligand of LAG-3, an immune inhibitory receptor that mediates T-cell suppression. Blocking FGL1/LAG-3 interaction improves anti-tumor immunity.

Creative BioMart has currently developed FGL1 proteins from multiple species. Their binding activity with LAG-3 protein has been verified by functional ELISA.

Fibrinogen-like Protein 1		
Synonyms	FGL1; fibrinogen-like 1; HFREP 1; hepassocin; HFREP1; HP-041; LFIRE1; LFIRE-1; MGC12455	
Species	Cat.No.	Product Name
Human	FGL1-I19H	Recombinant Human FGL1 Protein, HIgG1 Fc-tagged
	FGL1-I19HB	Recombinant Human FGL1 Protein, HIgG1 Fc-Avi-tagged, Biotinylated
	FGL1-I20H	Recombinant Human FGL1 protein, His-tagged
Mouse	FGL1-I22M	Recombinant Mouse FGL1 protein, His-tagged
	FGL1-I23M	Recombinant Mouse FGL1 Protein, HIgG1 Fc-tagged
Rat	Fgll-8245R	Recombinant Rat Fgll protein, His & GST-tagged
Cynomolgus / Rhesus macaque	FGL1-I24C	Recombinant Cynomolgus/Rhesus macaque FGL1 Protein, HIgG1 Fc-tagged
Cattle	FGL1-8242C	Recombinant Cattle FGL1 protein, His & S-tagged

Creative BioMart provides:

- >95% highly purified products
- Active sample testing size at low price
- Competitive bulk price for quantity of 1mg and more
- Multiple tag and expression host options
- Flexible custom service of labeling, secondary purification, formulation optimizing
- Protein activity tests
- Fast turnaround
